

# RecallTrak<sup>®</sup>

## Creating opportunities to grow your business.

**RecallChek** is the first service for consumer recalls in the United States and has compiled over 205 million recalls from public records, to create a fail-safe system to check for dangerous flaws with home appliances.

If a manufacturer designs a dangerous product, they **MUST** recall that item and fix it free of charge! RecallChek will provide the information to resolve any potential recall issues promptly.

### RecallTrak

Included as a lifetime service with your purchase of RecallChek (or provided free on inspections done by your inspection company) is our monthly email newsletter, RecallTrak. This newsletter notifies the homeowner of any new recalls on your appliances, and offers our helpful Monthly Maintenance Minute updates.

### How RecallTrak works:

1. Register for RecallTrak through the email you receive for the RecallChek report with that inspector.
2. You just add your contact information and upload a logo or photo of yourself, it's that easy.
3. As a RecallTrak Registered Agent, you have the option to customize the newsletter that is already going to your past clients, in a Constant Contact style marketing email, and manage your contacts in your account.
4. Just book your next inspection with your Home Inspector who offers RecallChek today!

Hello Christopher Granger,

It's a brand new year - a time when many vow to keep a "New Year's Resolution". Since the beginning of this tradition, one of the top ten most common resolutions has always been either to save money or manage debt. It doesn't matter where the economy is or where you are - we always have a sense that we could be doing something better in that department.

Any of these are possibilities, and you might consider sitting down with an independent insurance agent that represents multiple carriers to address each policy on an annual basis.

### Your Monthly Maintenance Minute

Conserving energy while extending the life of your Refrigerator. Keeping your refrigerator running optimally is easy and takes less than a minute - all you have to do is clean the coils!
